

National Immunization Survey Teen (13 through 17 years old)

2014 National

Adolescents Surveyed 20,827 January - December		Percentage of Children Vaccinated
Tdap	87.6%	
Varicella (2 doses)	81.0%	
MCV	79.3%	
HPV (1 dose)	60.0% (female) 41.7% (male)	
HPV (3 doses)	39.7% (female) 21.6% (male)	

2014 Missouri

Adolescents Surveyed 361 January - December		Percentage of Children Vaccinated
Tdap	86.1%	
Varicella (2 doses)	N/A	
MCV	63.3%	
HPV (1 dose)	47.5% (female) 27.9% (male)	
HPV (3 doses)	28.3% (female) 11.3% (male)	

2013 National

Adolescents Surveyed 18,948 January - December		Percentage of Children Vaccinated
Tdap	84.7%	
Varicella (2 doses)	76.8%	
MCV	76.6%	
HPV (1 dose)	56.7% (female) 33.6% (male)	
HPV (3 doses)	36.8% (female) 13.4% (male)	

2013 Missouri

Adolescents Surveyed 208 January - December		Percentage of Children Vaccinated
Tdap	80.9%	
Varicella (2 doses)	58.6%	
MCV	60.2%	
HPV (1 dose)	44.5% (female) 21.2% (male)	
HPV (3 doses)	27.7% (female) N/A (male)	

2012 National

Adolescents Surveyed 19,199 January - December		Percentage of Children Vaccinated
Tdap	84.6%	
Varicella (2 doses)	74.9%	
MCV	74.0%	
HPV (1 dose)	53.8% (female) 20.8% (male)	
HPV (3 doses)	33.4% (female) 6.8% (male)	

2012 Missouri

Adolescents Surveyed 292 January - December		Percentage of Children Vaccinated
Tdap	88.0%	
Varicella (2 doses)	53.6%	
MCV	58.3%	
HPV (1 dose)	51.6% (female) 21.7% (male)	
HPV (3 doses)	34.5% (female) N/A (male)	

Source: National Immunization Survey, Centers for Disease Control and Prevention

The National Immunization Survey (NIS) is performed by the Centers for Disease Control and Prevention (CDC) and collects statistics for each state on the immunization coverage for children 13 through 17 years of age between January and December, each year. Statistics are released every August for the previous year. For information on the NIS methodology and previous years, visit <http://www.cdc.gov/vaccines/imz-managers/coverage/nis/child/index.html>.

NIS vaccine coverage definitions:

- Tdap: 1 dose of tetanus toxoid, reduced diphtheria toxoid, and acellular pertussis (Tdap) since the age of ten years
- Varicella (chickenpox): 2 or more doses of varicella vaccine
- MCV: 1 dose of meningococcal conjugate vaccine or meningococcal - unknown type vaccine
- HPV: 1 dose of human papillomavirus vaccine, either quadrivalent or bivalent
- HPV: 3 doses of human papillomavirus vaccine, either quadrivalent or bivalent
